Hello Mr. Lewis,

I received your voicemail after I left you a message today, but was unable to return the call this afternoon. I certainly understand the issue of cellphone access. Your questions concerned two AB cases, nos. 2007-097 and 2007-098 and information provided therein. Please know that once an allegation is substantiated and management decides to propose an action that the information on the AB case becomes part of the disciplinary/adverse action file. This information is available to an employee as information relied upon. At the issuance of the proposed action you should be provided this information to consider in your response. If you were not provided the information relative to a particular charge and the AB, then please contact the proposing official for this information. If there is other information you are interested in requesting, then you may submit a request under the Freedom of Information Act, through Carlette Steadman which would be responded to by the appropriate office.

Thank You!
