

The table below shows the contents of FAA's 1/13/11 Response to F11-1765. The left column shows page number within that FOIA Response, but the contents have been sequenced using the contents of the right column. Evidently, in response to the 12/10/10 FOIA Request, an AHIS Report was printed on 12/21/10, measuring 26-pages (which are also in chronological order). Each page of that 12/21/10 report had a header, numbering that page within the 26-pages total.

It is clear that the Administrator's Hotline office queried the 12/21/10 AHIS Report, and printed out the contents. It is also clear that, when this AHIS Report was reviewed by AAE-1, Mr. Foushee chose to fully redact pages #3, #9, #12-13, and #18-19. A substitute copy for page #3 of the AHIS Report was printed on 1/13/11 (see the footer on the different versions of this page).¹ The time windows for all four of these full-redactions correlate with the CCR ATCT Hotline complaints (three related to ATCS Papageorge, on 10/23/06, 11/14/06 and 11/21/06; and one related to ATCS Lewis on 2/7/07).

¹ Why the substitution? Most likely, the first copy had content they wanted to conceal; or, perhaps the first copy became marked up during the FOIA review. In either case, the original page #3 needs to be disclosed.
