Jeff,

I have never stated that I was unable, or unwilling to assist you on your issues. Quite to the contrary I have sacrificed considerable personal time to you. If you choose to make such accusations against me I recommend that you start a "Duty of Fair Representation" charge against me. That way I can appropriately defend myself. When I said that "I was tired" I was referring to the lack of movement and information on the part of the agency. I stated that quite clearly to you. To make such an allegation otherwise is a very serious charge on your part and I will be consulting others as to how I can now defend myself from you.

All of this being said I do need to inform you that because you have chosen to file your grievance under the illegal "white book" I will no longer be your point of contact. I can not assist you in that you have decided to use a process that I am not able to participate in. I wish you the best of luck. Please do not contact me again.

David B. Caldwell
