### U.S. Department of Transportation

Mr. Daniel Elwell  
Federal Aviation Administration  
800 Independence Avenue, SW  
Washington, DC 20591

Dear Mr. Elwell:

Communities throughout the country are now experiencing the devastating effects of NextGen . From the East Coast to the West Coast, citizens are forced to live lives of misery due to the unrelenting, unyielding, never-ending flights over their homes. The human outcry has roared over the land but still the FAA has turned a deaf ear to the pleas of the people. We, as citizens of a free country, are guaranteed human rights which were the building blocks of our nation. The deceptive abduction of our liberties lies in the hands of the FAA.

The American people were ambushed by the implementation of a system that has constricted flight paths, lowered altitudes, and increased frequency in specific communities living under the superhighways in the skies. The cunning way in which the FAA justifies this oppression is through misinformation and deceit. By citing safety and efficiency standards, the FAA defends its abuse on each and every individual knowing full well that we are exposed to deleterious health effects from noise and air pollution. The agency wields its power on citizens who do not have the appropriate means to fight a mammoth bureaucracy while the airline industry is receiving huge profits; all from our suffering.

***“Wealth is being generated off the back of oppression and abuse.” Sharan Burrow***

Our peace, our sanctity of our homes, our health, and the health and welfare of our children have been snatched from unwitting communities. Our dreams have been hijacked by corporate greed and an impervious government agency. Through our despair and struggle to right this

wrong, each and every one of us holds on to our American dream. We have a dream, a dream that is deeply planted in the hearts and minds of each individual who is the victim of this injustice.

***We have a dream*** that one day the oppression and abuse we are forced to endure from a failed aviation system will cease.

***We have a dream*** that we will be able to live our lives free from health dangers generated by toxic airplane emissions and excruciating levels of noise.

***We have a dream*** that the FAA will stop enslaving us by their false narratives and propaganda.

***We have a dream*** that the FAA will respect the dignity of every man, woman and child and work to end our nightmare.

***We have a dream*** that these injustices will ring out across the nation and the people will have their lives restored.

***“The truth which has made us free will in the end make us glad also. Every outcry against the oppression of some people by other people, or against what is morally hideous is the affirmation of the principle that a human being as such is not to be violated. A human being is not to be handled as a tool but is to be respected and revered.” Felix Adler***

**WE HAVE A DREAM!**
